THE NATIVE AMERICAN COLLECTION

by Colette Myles, GCI

Adding to items already in the library, the regional Native American Program donated a number of books and videos, allowing the Region 9 Library to set up a special collection on Native American Studies.

Whether you want to check-out a book on the subject of environmental issues on Indian land, such as *Endangered People: Indigenous Rights and the Environment* (University of Colorado Press) or *Pueblo Water Rights: Struggle for a Precious Resource* (University of Arizona Press), or prefer to read classic studies such as Dee Brown's *Bury my Heart at Wounded Knee* or *Sacred Narrative: Readings in the Theory of Myth*, edited by Alan Dundes, you will find a wide choice of titles in the Native American Collection area, located in the Reference Room of the Library.

EPA implements established environmental laws and regulations on Indian lands and strives to facilitate communications with tribal governments. Region 9 coordinates EPA's mission for all the Indian lands under its jurisdiction. The Native American Collection will provide background materials for EPA staff members working on Native American issues and for a public more and more interested in these issues. Already, the Library has developed an Environmental Justice Collection consisting mostly of selected articles, a number of which deal with Native American environmental issues.

In all, the Native American Program donated twenty books and thirty video tapes to the library. It also generously provided the assistance of a summer intern, Greg Sirek, who processed the books cataloged by Karen Sundheim, GCI Librarian, and developed a Lotus Notes database of items in the collection. The Lotus Notes database titled: "Native American Collection" lists items located both in the Program's office and in the library. This database is available on the LAN.

EARTHLAW

How to find the CFR (and more) on the LAN

by Karen Sundheim, GCI

Does the prospect of finding a citation in the CFR make you weary? Are you tired of flipping through the CFR index, only to find you have to search through several more volumes in hopes of finding precisely what you need? Is it frustrating to have to search through the Federal Register, the LSA, the CFR, and then perhaps California regulations?

Now there is an easy way to search any one or all of these references at once, by just using a few keystrokes. The EarthLaw CD-ROM, accessible from your workstation, is fully searchable and contains the full text of all environmental Public Laws, the Code of Federal Regulations (including transportation and occupation health and safety), and Federal Register notices. It also includes State of California regulations.

EarthLaw is user-friendly. From the Automax menu press F6 for LAN Services, then F3 for CD-ROMs, and finally F1 for EarthLaw. Once you're in the Search Screen, you can use simple words or phrases, or you can perform a complex search using boolean logic. A list of citations will appear, and you can select an item or a range of items to view, download, or print.

For example, a search on the word "benzene" brings up 220 hits. One can then edit that search, and for example, limit the time frame to the past 18 months. That brings up approximately 160 hits. Then a menu appears, listing the documents containing "benzene", with the most recent Federal Registers first. Following Federal Register links, there are links to sections of the Code of Federal

(Continued p. 2, col. 2)

NATIVE AMERICAN (Continued from p. 1)

Greg Sirek also entered video information in the library's Lotus Notes Video database (also available on the LAN), creating the new category "Native American Studies". There, one can find titles such as the historical *500 Nations* series, or the PBS videos: *Winds of Change*, *Last Stand at Little Big Horn*, *Geronimo and the Apache Resistance*, etc. Environmental videos include *Earth and the American Dream*, *Water and Mining on the Black Mesa*, etc.

Basic reference works enrich the Native American collection. One can consult D. H. Eargle's *The Earth is my Mother: a guide to the Indians of California*, or the Smithsonian Institution encyclopedic *Handbook of North American Indians*, of which the library owns four volumes: v.4: *History of Indian-White relations*, v.8: *California*, v.9 & 10: *SouthWest*.

The Library also subscribes to the newspaper: *Navajo Nation*.

We hope that the new collection will grow and we have no doubt that it will be used and appreciated by all the Region 9 Library patrons.

**NEW IN THE
HAZARDOUS WASTE COLLECTION**

Alternatives for Ground Water Cleanup

National Academy Press. Washington, D.C., 1994

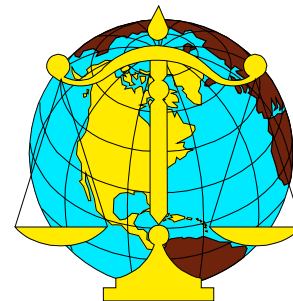

TD426.A48 1994 HWC

This book is a study of the performance of groundwater cleanup technologies with an emphasis on groundwater extraction and treatment (pump and treat) systems. The study included 77 pump and treat systems running as long as 12 years. The study showed that while pump and treat systems can often contain and shrink plumes, they usually cannot cleanup groundwater contamination to drinking water MCLs in a reasonable amount of time. This is especially true for groundwater contaminated with chlorinated solvents. The study points out that cleanup levels are still being set at MCLs by the Regulatory Agencies even when cleanup technologies don't exist that can reach MCLs. The policy issues behind this dilemma are also explained. The committee that compiled the study also gives practical recommendations for changing the direction of groundwater cleanup. The book is very well written and easy to read with a lot of case studies. I found Table ES-1 particularly useful. I highly recommend this book and I think it should be required reading for all RPMs!

Book Review kindly provided by Rachel Simons, U.S. EPA

EARTHLAW

(Continued from
column 2, p. 1)

Regulations, the U.S. Code, California environmental regulations, and finally regulations by local districts, such as the Bay Area Air Quality Management District, the Los Angeles Regional Water Quality Control Board, etc. One can view each document by pressing the "enter" key, and then one can immediately find the first point where benzene is mentioned by using the "Tab" key. One can also download or print any part of a document.

Another useful feature in Earthlaw is the Table of Contents. One can select any title, such as the Clean Air Act or a section of the CFR, and choose from one of the pull-down menus "Table of Contents".....and an outline of the document will appear on the screen. From the outline one can also choose and jump to a section to view, download or print.

Stay tuned for Part II in the next issue of Library Line, with news about another, even snazzier electronic source for searching the Code of Federal Regulations!

**JOURNAL NEWS**

by Mary Winn, GCI

*The following titles will soon be
received in the library:*

Journal of Environmental Quality. American Society of Agronomy. Madison, WI

Journal of Pesticide Reform. Northwest Coalition for Alternatives To Pesticides. Eugene, OR.

Hastings West-Northwest Journal of Environmental Law and Policy. University of California, Hastings College of Law. San Francisco, CA.
